PROFESSIONAL SUMMARY

Enthusiastic Computer Science student and Backend Developer skilled in Java, web development, and database technologies. Proficient in developing practical enterprise web applications using Java Servlets, JSP, Spring Boot, and JDBC integrations. Seeking an opportunity to apply core technical skills and accelerate professional growth in the enterprise IT domain.

TECHNICAL & CORE SKILLS

Programming	Java (Core Java), SQL, JavaScript, HTML, CSS
Web Technologies:	JSP, Servlets, Spring Boot
Database Systems:	MySQL, Database Management Systems (DBMS), JDBC Architecture
Core Computer Science:	Core Data Structures & Algorithms, Object-Oriented Programming (OOP), File Handling
Professional Attributes:	Adaptability, Quick Learner, Effective Communication Skills, Problem Solving

EDUCATION

Shri Vaishnav Institute of Technology and Science (SVVV) <i>Bachelor of Technology (B. Tech) – Computer Science Engineering</i> Cumulative Grade Point Average (CGPA): 6.7 / 10	Indore, MP 2022 – 2026
Government H.S. School (M.P. Board) <i>Higher Secondary School (Class XII)</i> Aggregate Percentage: 79%	Burhanpur, MP 2022

ACADEMIC PROJECTS

YouTube Creator Hub – Full-Stack SaaS SEO Tool (Major Project) <i>Tech Stack: Spring Boot, Spring WebFlux (WebClient), Thymeleaf, Tailwind CSS, Jackson, Regular Expressions</i> - Engineered a production-ready SaaS automation engine communicating with the YouTube Data API V3 using reactive non-blocking network layers (`WebClient`) to parse fast JSON token metrics. - Implemented multi-format YouTube URL identification utilities powered by decoupled Regex architectures (`Pattern.compile`), stripping target video streams without system execution latency. - Designed a client-side binary payload transformation workflow handling image objects (`Blob`), driving safe and direct file system image downloads, and integrated a persistent localStorage UI dark/light engine.	Personal Project 2026
AI-Based Employee Management System <i>Tech Stack: Core Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, JavaScript</i> - Developed a comprehensive HR management platform including employee management, role-based authentication, an AI chatbot, performance prediction, a skill recommendation engine, attendance analysis, an employee ranking system, and an analytics dashboard. - Applied MVC architecture, DAO pattern, Graph algorithms (BFS), HashMap, Queue, Stack, and PriorityQueue to implement AI-inspired functionalities.	Individual Project 2026
Lost & Found Portal For Campus (Major Project) <i>Tech Stack: JSP, Servlets, JDBC, HTML, CSS, JavaScript, Bootstrap, MySQL</i> Engineered a secure full-stack campus property recovery portal using Java Servlets and JSP handling active request processing routing.	Team Project SVVV 2025

- Implemented dynamic user workflows including individual member registration modules, item upload/reporting logs, advanced content search filters, and an administrative control panel for item resolution management.
- Integrated a relational MySQL backend database using JDBC connectors to maintain data integrity and user profiles.

CERTIFICATIONS & ACHIEVEMENTS

- **NPTEL Online Certification:** Programming in Java – Elite credential validating foundational language concepts.
- **NPTEL Online Certification:** Data Structure with Java – Demonstrating proficiency in data structures and abstract programmatic problem-solving.
- **HackerRank Verification:** Earned official programming badges validating core software development syntax and logical execution.
